Professional Summary

Product Manager experienced in leading AI-enabled B2B products from discovery through definition, prioritization, and delivery. Skilled in identifying user problems, shaping product requirements, and making data-informed trade-offs to drive product direction. Strong ability to align cross-functional teams around roadmap decisions and deliver solutions that create measurable customer and business value.

Experience

Product Manager | 4Cast | 2025 – Present

AI-powered Decision Intelligence platform

- Defined product problems through discovery and customer conversations, identifying key user pain points and operational gaps in decision-making workflows.
- Translated business and user needs into product requirements, validating assumptions and aligning stakeholders on product direction and expected outcomes.
- Defined and shaped an AI-powered recommendation assistant that helps users prioritize the highest-impact actions to improve operational readiness.
- Designed and iterated on an end-to-end user workflow to improve usability, reduce complexity, and increase product adoption based on user feedback and usage insights.
- Owned product prioritization and roadmap decisions, making trade-offs between customer value, business goals, and technical feasibility in collaboration with engineering teams.

Project Manager | Campus IL | 2023 – 2025

The national digital learning venture

- Led end-to-end management of high-impact technology projects using Agile methodologies within the SDLC, ensuring delivery on time, within scope, and within budget.
- Defined product and system requirements in collaboration with cross-functional teams, including developers, UX/UI designers, and instructional experts.
- Managed stakeholder engagement and cross-departmental coordination, aligning business and operational needs throughout the project lifecycle.
- Managed vendor implementations and go-live deployments while maintaining project documentation to support backlog management, sprint planning, and successful delivery.
